

WORK EXPERIENCE

Software Engineer

Sep 2022 - Present

P-NUT Health, Bangalore

- P-NUT asks clients to fill out a questionnaire about their current health and gives them a personalized medical report geared for holistic wellness (<https://personalnutrition.com>). As the first engineer in a five-member startup, I built a near fully-automated report creation system, supporting growth from 100 reports processed per month to 2000 reports (in 2 months).
- Worked with medical, sales and ops teams to build internal productivity tools.
- I am now building a small team of engineers developing an MVP of a SaaS product for nutritionists.

Editorial Consultant & Writer

Jan 2020 - Mar 2022

Film Companion South, Chennai

Wrote about films (features, reviews and interviews) as a part of three-member Film Companion South editorial team led by National award-winning film critic Baradwaj Rangan.

Machine Learning Engineer

Aug 2018 - Nov 2019

Mad Street Den, Chennai

- Reported to the CTO working on incubating machine learning projects.
- Built data pipelines for a deep learning networks using Python. Deployed it on AWS using services like EC2, lambda and S3 with basic automation and scaling of servers.
- Managed a team of 5 engineers developing backend tools and frontends for various ML products.
- Liaised with management, product, sales team and clients to coordinate product development.
- Automated manipulation of 3D models using Blender scripting in Python to create training datasets.

Member of Technical Staff

Jul 2017 - Jun 2018

CasaOne, Bangalore

- As a part of the founding team I wrote CasaOne's augmented reality iOS app.
- Was part of a team of 5 engineers to develop an e-commerce webapp (MERN stack), delivery logistics management iOS app and warehouse management webapp.

Software Engineer

Aug 2016 - May 2017

Yakit, Bangalore

Yakit is an international logistics company. I built the in-house customs agent interface (Groovy on Grails) used to track and manage packages at customs terminals.

Team Lead

Mar 2016 - Aug 2016

Knolskape, Bangalore

Knolskape makes gamification and simulation software. I set up and managed the mobile division of the company with a mandate to build and release initial versions of iOS and Android apps with a team of 3 engineers.

Tech Lead

Apr 2015 - Feb 2016

Shopmonk, Bangalore

- I built an e-commerce backend in PHP using the Laravel Framework and hosted it on AWS as the first engineer at the company.
- Built and managed a small team of five engineers.

Research Scientist

Nov 2012 - Dec 2013

University of Wisconsin, Madison

Worked as a part of DARPA-funded project to develop neural prosthetics. We ran large-scale, detailed simulations of the primary motor cortex on a high performance cluster to work out the mapping between neural activity patterns and corresponding physical tasks.

EDUCATION AND QUALIFICATIONS

Doctor of Philosophy (Unfinished; All But Dissertation)

Feb 2009 - Nov 2012

Australian National University, Canberra

- Pursued graduate studies in Computational Neuroscience.
- Peer-reviewed publications: <https://pubmed.ncbi.nlm.nih.gov/?term=Ashutosh+Mohan>

Bachelor of Technology

May 2004 - May 2008

SSN College of Engineering, Chennai

ACHIEVEMENTS

1. As a hobby project in graduate school, single-handedly ported a mathematical education software called XPP to the iPad and iPhone using Objective-C. It was in active development from 2010 to 2016 and used at various universities for teaching dynamical systems courses. Few reviews from the app store:
 - "[...] killer app in classroom demonstrations."
 - "This app is plainly astonishing!!"
 - "Hard to believe these geniuses got XPP to work, and work very well, on the iPad."
2. One hexadecimal dollar at Prof. Donald Knuth's Bank of San Serriffe for pointing out a typographical error in his 'Art of Computer Programming' — <https://www-cs-faculty.stanford.edu/~knuth/boss.html>
