Machine Learning Engineer

Aug 2018 - Nov 2019

Mad Street Den, Chennai

- Reported to the CTO working on incubating machine learning projects.
- Built data pipelines for a deep learning networks using Python. Deployed it on AWS using various services like EC2, lambda, S3 with basic automation and scaling of servers.
- Managed a team of 5 engineers developing backend tools and frontends for various ML products.
- Liaised with management, product, sales team and clients to coordinate product development.
- Automation of 3D models using Blender scripting in Python to create training datasets.
- Used MS Excel scripting to build a frontend along with a backend server implementation to collect data for a machine learning product that predicted Harmonized System (HS) codes from product titles.

Member of Technical Staff

Jul 2017 - Jun 2018

CasaOne, Bangalore

- As a part of the founding team I wrote CasaOne's augmented reality iOS app.
- Part of a team of 5 engineers to develop an e-commerce webapp (MERN stack), delivery logistics management iOS app and warehouse management webapp.

Software Engineer

Aug 2016 - May 2017

Yakit, Bangalore

Yakit is an international logistics company. I built the in-house customs agent interface (Groovy on Grails) used to track and manage packages at customs terminals.

Team Lead

Mar 2016 - Aug 2016

Knolskape, Bangalore

- Knolskape makes gamification and simulation software. I set up and managed the mobile division of the company with a mandate to build and release initial versions of iOS and Android apps with a team of 3 engineers.

Tech Lead

Apr 2015 - Feb 2016

Shopmonk, Bangalore

- I built an e-commerce backend in PHP using the Laravel Framework and hosted it on AWS as the first engineer at the company.
- Built and managed a small team of 5 engineers.

Research Scientist

Nov 2012 - Dec 2013

University of Wisconsin, Madison

Worked as a part of DARPA-funded project to develop neural prosthetics.

EDUCATION AND QUALIFICATIONS

Doctor of Philosophy (Unfinished; All But Dissertation) Australian National University, Canberra	Feb 2009 - Nov 2012
Pursued graduate studies in Computational Neuroscience.	
Bachelor of Technology SSN College of Engineering, Chennai	May 2004 - May 2008

ACHIEVEMENTS

- As a hobby project in graduate school, single-handedly ported a mathematical education software called XPP to the iPad and iPhone using Objective-C. It was in active development from 2010 to 2016 and used at various universities for teaching dynamical systems courses. Few reviews from the app store:
 - "[...] killer app in classroom demonstrations."
 - "This app is plainly astonishing!!"
 - "Hard to believe these geniuses got XPP to work, and work very well, on the iPad."
- One hexadecimal dollar at Prof. Donald Knuth's Bank of San Serriffe for pointing out an error in his Art of Computing Programming.
